

Agenda for Upcoming ACT Meeting

A Place for Discussion

An agenda for an upcoming meeting with an ACT Advisor, organized by discussion topics:

Meeting Agenda: FSWEP Application & Career Strategy

1. Introduction & Immediate Updates

- a. Update on current academic standing and fourth-year BCS course load.
- b. Confirmation of newly created FSWEP profile and self-declaration under the Employment Opportunity for Students with Disabilities (EOSD) stream.

2. Fast-Tracking & Institutional Advocacy

- a. Explore direct referral channels between Carleton's ACT to Employ program and federal hiring managers in Ottawa.
- b. Strategies for leveraging ACT network connections for specialized IT, software development, and database administration roles.

3. Workplace Accommodations & Remote Setup

- a. Discussion of specific accommodation needs for remote or hybrid work environments.
- b. Navigating support from the Accessibility, Accommodation and Adaptive Computer Technology (AAACT) program during onboarding.
- c. Requests for asynchronous task scheduling or specialized technical hardware/software adjustments.

4. Profile Optimization & Next Steps

- a. Reviewing and refining the FSWEP profile to highlight remote-work capabilities and technical coursework.
- b. Establishing clear follow-up milestones and communication timelines between the advisor and student.

Accommodation Plan

A list of specific workplace, environment, and scheduling accommodation requests structured for a meeting with an ACT to Employ advisor:

1. Schedule & Work Structure Accommodations

- **Flexible/Asynchronous Working Hours**
 - Core-hours flexibility (e.g., allowing work to be completed within a wider window rather than strict 8:30 AM – 4:30 PM bounds) to accommodate peak focus hours and manage energy levels.
 - Buffer time between back-to-back meetings or task shifts to prevent cognitive overload.
- **Predictable Task Structure & Clear Deliverables**
 - Written follow-ups for action items after verbal instructions or team meetings.
 - Task breakdown assistance or explicit prioritization from project managers for complex or multi-step assignments.

2. Environment & Remote Work Accommodations

- **Remote or Hybrid Work Configuration**
 - Full remote options or predictable work-from-home days to minimize sensory strain and transit fatigue.
 - Access to dedicated, quiet workspace options if working on-site (e.g., noise-canceling headsets, low-traffic desk locations, or reduced lighting intensity).

3. Technical & Adaptive Computer Technology (AAACT Support)

- **Hardware & Ergonomic Needs**
 - Ergonomic peripherals (e.g., vertical mouse, split keyboard, or dual-monitor setup for screen organization).
 - High-quality noise-canceling headphones for focus during remote calls or office time.
- **Software & Digital Accessibility**
 - Screen-reading, text-to-speech, or dictation software options if needed.
 - Specialized focus tools (e.g., website blockers, visual timers, or specialized project management/task tracking software).

4. Onboarding & Communication Preferences

- **Structured Onboarding Support**
- A clear, written 30-60-90 day onboarding checklist during initial training.
 - Assignment of a peer mentor or buddy within the team for routine, day-to-day questions.
- **Communication Style Adjustments**
 - Preference for text-based asynchronous communication (e.g., MS Teams/Slack) over unscheduled audio or video calls.
 - Explicit feedback and performance check-ins scheduled at regular intervals.
